

## Youth 2

### Action Plan – Situation Information

Zinet is 20 years old and currently lives at youth apartment Rikshem , but will need to find her own apartment later on.

She currently receives CSN funding but wants to start working part-time while studying, preferably in an office setting, such as administration.

Zinet attends adult education (Komvux) and primarily wants support regarding housing, though she sometimes struggles with motivation for school and organizing her daily routine. Daniela will participate in meetings with the school. Zinet potentially has ADHD; she has visited a doctor and an evaluation is ongoing, but no diagnosis has yet been confirmed. Daniela will follow up on this matter. Zinet currently receives homework assistance at school but has limited support for planning her studies. We have coordinated with the school so we can provide various types of assistance.

The following plan is in place:

Erika will assist and support with planning and school-related tasks, while Daniela will assist and support with job searching, housing, and health-related matters. Zinet, Daniela, and Erika will work together toward the goal of achieving independence, with the eventual objective that Zinet will independently manage contacts with healthcare providers, the school, housing authorities, etc.
